Stroke Volume	77.5	49.8	-27.7

SAMPLE- PERFORMANCE REPORT

Supine L/Zo ratio is normal at 104%. Supine stroke volume index is low at 23.4 with mildly increased TSR of 1804.6. The heart rate and blood pressure remain relatively unchanged. These findings indicate The patient is on the ascending limb of the Starling curve and no further modification in current therapeutic regimen is necessary at this time.
